Two Interesting Patients Before the Jackson County Medical Society.

Two patients, suffering from extreme nitrate of silver poisoning, were exhibited by Dr. Joseph Sharp at the meeting of the Jackson County Medical Society last night. One was a woman, nearly 40 years of age, and the other a colored man of middle age. Both were of the horrible blue color which marks poisoning by nitrate of silver. The colored man said that he had been in the habit of taking as much as three-fourths of a grain of nitrate of silver daily. He explained that he had been a "blue man" for the last twenty-five years, having taken the medicine for a long time. The society was very interested in the two cases, which were quite striking. The society is a branch of the American Medical Association, and is held in the city of Jackson, Mo.
